DIABLO™

WIRE ARC SPRAY SYSTEM

**AIR
PRESSURE**

AIR

**RC3
GUN**

Where did it get its name?

“The Diabolo”

Diabolo=Devil

Espanol

Revelations 14:11

“And the smoke of their torment ascendeth up for ever and ever: and they have no rest day and night, who worship the beast and his image, and whosoever receiveth the mark of his name”

- 100% Duty cycle (you can spray day and night)
- “Has no rest”
- Very robust and durable
- **Worship the beast and receiveth his mark**

Rodney Robison the founder

Where is Hell and How hot is it

At the Center of the world

“Scientists have yet to directly measure the temperature of the Earth's inner core, but most estimates put it at somewhere between 9,000 and 11,000 degrees Fahrenheit .That's pretty hot — hot enough, in fact, to melt that iron-alloy ball under normal conditions, but the constant weight of the rest of the planet pressing down on it keeps the core, which is about one-third the size of the moon, solid. (It's hot enough to melt iron, but apparently not quite hot enough to melt one's eternally damned soul.)” www.livescience.com

The Diablo's arc zone...10,000 F

Which makes The Diablo hot as hell

Daiablo

- Traction Coating on steel mill rolls
- Hard surfacing on guide rolls, looper rolls, conveyor rolls and more.
- We have developed many different wires depending on your applications.
